- Post operative training

Contraindications:

The scientific investigations performed so far have not registered any side effects and have thus not provided any contra-indications to the use of the Vacusac equipment. However, it is recommended not to use the Vacusac therapy in the following:

- * Pregnancy after 4th month
- * Malignancies
- * Acute myocardial infarction
- * Embolism of pulmonary artery
- * Therapy with anticoagulants
- * Diseases with abnormal haemostasis

The whole Vacusac treatment does evidently strengthen and balances the energies in the Meridians.

The Vacusac "Vacupuncture" system can be used on acupuncture points.

Knowledge about reflexology and Foot Zone Therapy / Acupressure will be necessary to use this feature.
